Coading Barge, Inlet

In the flood of 1935, Ithaca and its surrounding areas got over eight inches of rain in a span of twenty-four hours.

Trees planted along Cayuga Inlet (date unsure of: 1952 or before)

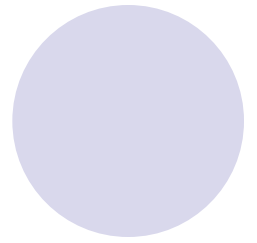

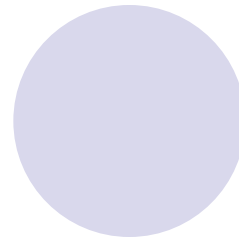

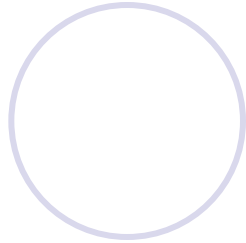

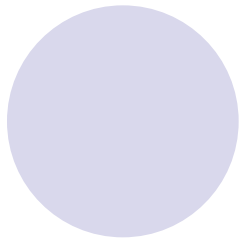

Dredging Flood Control Channel (date unknown)

Summary

- The Cayuga Inlet was a major commercial way until the early 1900s.
- Barges started to disappear, replaced more and more by railroads.
- Use turned more recreational than industrial.
- City made efforts to beautify inlet, accumulating in the design of Cass Park.

A special thanks to:

The History Center

For making much of this possible.
