

# 2026 Program Schedule:

*Designed for children ages 5-12 and welcoming to all, this **free** series offers fun, safe, and inclusive experiences that spark curiosity and connection! Through outdoor exploration, simple science, and hands-on water quality data collection, participants build an understanding of the Cayuga Lake Watershed, deepen their connection to local waterways, and see how their actions help protect the water we all depend on. Join the Community Science Institute this summer to explore the many ways water flows through our lives.*

Or visit our website for more information and to register!
